

Public consultation on the past, present and future of the European Research & Innovation Framework programmes 2014-2027

Fields marked with * are mandatory.

INTRODUCTION

This consultation aims to collect the views of research institutions, businesses, consumer organisations, as well as non-governmental organisations, public authorities, and other stakeholders on the European Union Framework Programmes (FP) for Research & Innovation, **Horizon 2020** (8th FP) and **Horizon Europe** (9th FP).

The consultation has **five sections**:

- **Section A “About you”** asks information about the respondent’s profile.

- **Section B** focuses on the **past programme Horizon 2020** (2014 – 2020) and aims to collect feedback and evidence to **draw lessons from the past**. This part of the consultation will feed into the ex-post evaluation of Horizon 2020.
- **Section C** focuses on the **current programme Horizon Europe** (2021 – 2027) and aims to take stock of what stakeholders are currently experiencing to possibly **adapt current actions**. This part of the consultation will feed into the mid-term evaluation of Horizon Europe, covering the period 2021 – 2023.
- **Section D** collects views and opinions for the **upcoming Strategic Plan of Horizon Europe (2025 – 2027)**. The questionnaire concerns the future societal challenges that should **shape future EU research and innovation** activities, the strengths and weaknesses of the European R&I system, EU Missions, European Partnerships and synergies with other EU programmes.
- **Section E** asks about the **key lessons learned and messages for the future**. If you wish so, you can **upload a position paper** in this section.

You can choose to **complete only one or more sections** of the consultation.

You can **save your contribution as a draft** on the server and continue later or on a different day.

As the consultation looks at the **past, the present and the future of European Research Framework Programmes**, some topics are addressed under multiple sections.

For example, both section B (Horizon 2020) and section C (Horizon Europe) examine how the programmes contributed (or is contributing) to climate, health, digital and industrial transitions. Likewise, questions on the programme's implementation and administrative procedures are asked in the two sections to account for the simplification measures introduced in Horizon Europe.

What (would have) happened to your research and innovation project(s), without European-level funding through Horizon Europe?

My project(s) would be:

- Funded by a **public** source at national or regional level, without any major changes in scope, duration or level of ambition
- Funded by a **private** source at national or regional level, without any major changes in scope, duration or level of ambition
- Funded (by either a public or private source), but with a **substantial reduction in scope, duration or level of ambition**
- No funding secured (by either a public or private source), but **would have taken place later**
- No funding secured, and would **not have taken place at all**
- Likely funded, at least to some extent, through other sources but without/ with **reduced cooperation with partners from other countries**
- Likely funded, at least to some extent, through other sources but without/ with reduced **interdisciplinary cooperation**
- Likely funded, at least to some extent, through other sources but with **reduced international visibility** of research and/or research team
- Funded by **another EU programme**, without any major changes in scope, duration or level of ambition
- Another scenario.
